Nanoptix Ultra System

Nanoptix

All the Control you want.

Introducing the Nanoptix Ultra System* for up to 6 machines!

*Patent Pending

Take your business to a whole new level of control, convenience, and efficiency with the new Ultra System from Nanoptix.

- Control machines remotely.
- "Cash out" and "clear credits" at a flick of a switch.
- Monitor all activities.

Requirements:

- All you need is a Nanoptix Spill-Proof Printer, control box, ultra board, and wire kit.
- Works with up to 6 machines.
- Any machine with an electronic "pulse" can be connected to the Ultra System (including gaming machines, vending machines, video games and more).

How it works:

- A player adds money to your machine as usual.
- When a player wishes to "cash out", they simply let the Attendant know which machine they were playing, and a simple push of the button on the control box triggers a printout of their credits and clears the machine they were playing on.
- Quick, simple and gives you total control.

Add Central System for even more Control!

- Can be added to Ultra System, Ultra System 7+, Cashless System and Cashless Attendant System.
- Allows the Operator to track all actions and transactions from all machines connected to the system from their PC.
- Every time there is an "input" or "output" from a connected machine, details are recorded and are available to the Operator.
- System can generate detailed reports or can be used as "View Only" as often as wished.
- Ideal way to keep track of all route activities.

Nanoptix Ultra System 7+

Nanoptix

All the Control you want.

Introducing the Nanoptix Ultra System 7+* for up to 18 machines!

*Patent Pending

It's the total control and hassle-free way to manage your business. Keep a watchful eye over many machines while minimizing manpower and maximizing your profitability.

- Control machines remotely.
- Add "credits", "cash out" and "clear credits" and more just by scanning a bar-code from a menu.
- Monitor all activities.

Requirements:

- All you need is a Nanoptix Spill-Proof Printer, ultra board, bar-code scanner, wire kit, and customer display.
- This system can easily accommodate up to 18 machines at a time (we recommend that all machines be visable to the attendant).
- Any machine with an electronic "pulse" can be connected to the Ultra System 7+.

How it works:

- When a player enters an establishment, they go to the counter and select a machine and amount to be played. This information is scanned with a bar-code scanner. Credits are automatically loaded into the selected machine.
- When the player is done playing, they return to the counter. Through use of a bar-code scanner, the machine number is scanned again and a printout of the "credits" generated. Credits are then cleared from the machine.

Add Central System for even more Control!

- Can be added to Ultra System, Ultra System 7+, Cashless System and Cashless Attendant System.
- Allows the Operator to track all actions and transactions from all machines connected to the system from their PC.
- Every time there is an "input" or "output" from a connected machine, details are recorded and are available to the Operator.
- System can generate detailed reports or can be used as "View Only" as often as wished.
- Ideal way to keep track of all route activities.

Nanoptix Cashless System

Nanoptix

All the Control you want.

Introducing the Nanoptix Cashless System* for up to 768 machines!

*Patent Pending

It's the completely cashless and absolutely convenient way to operate and control your business. Adding a Nanoptix Cashless System is the next logical step in building your business.

- Totally Cashless system without costly peripherals such as bill acceptors or coin acceptors.
- Control machines remotely.
- Add "credits", "cash out" and "clear credits" and more just by scanning a bar-code.
- Monitor all activities.

Requirements:

- All you need is a computer terminal, Nanoptix Spill-Proof Printer, ultra board, bar-code scanner, wire kit, customer display, and Nanoptix advanced software.
- This system can accommodate up to 768 machines.
- Any machine with an electronic "pulse" can be connected to the Cashless System.

How it works:

- Player goes to the counter and requests to play.
- They pay their money and go to a specific machine assigned by a receipt from the attendant.
- Attendant enters credits on a machine from the attendant station.
- After they are done playing – the player can cash out at the machine and a receipt is generated at the attendant station.
- Player returns their original receipt to the counter and is paid out.

Add Central System for even more Control!

- Can be added to Ultra System, Ultra System 7+, Cashless System and Cashless Attendant System.
- Allows the Operator to track all actions and transactions from all machines connected to the system from their PC.
- Every time there is an "input" or "output" from a connected machine, details are recorded and are available to the Operator.
- System can generate detailed reports or can be used as "View Only" as often as wished.
- Ideal way to keep track of all route activities.

Nanoptix Cashless Attendant System

Nanoptix

All the Control you want.

Introducing the Nanoptix Cashless Attendant System* for up to 768 machines!

*Patent Pending

Get all the control and convenience of a Full Cashless Casino System at a fraction of the price. It's simple, it's easy and it's the ultimate way to maximize your operation and bottom line.

- Totally Cashless system.
- Control machines remotely.
- Track player activity.
- Players can move from machine to machine.
- Quick, simple and very efficient.

Requirements:

- All you need is a computer terminal, Nanoptix Heavy-Duty Kiosk Printer, ultra board, bar-code swipe reader at each machine, wire kit, customer display, and Nanoptix advanced software.
- This system can accommodate up to 768 machines.
- Any machine with an electronic "pulse" can be connected to the Cashless Attendant System.

How it works:

- Player comes to the counter and requests to play and pays their money.
- A heavy-duty kiosk printer prints out an inexpensive cardstock receipt with a bar-code.
- Each machine is fitted with an easy to use bar-code swipe reader – the player swipes the card at the machine to load up credits.
- After play is done, the player returns to the counter for payout. The computer automatically tracks the status "credits" for each player. Players can even move from one machine to the next and all movements are tracked.

Add Central System for even more Control!

- Can be added to Ultra System, Ultra System 7+, Cashless System and Cashless Attendant System.
- Allows the Operator to track all actions and transactions from all machines connected to the system from their PC.
- Every time there is an "input" or "output" from a connected machine, details are recorded and are available to the Operator.
- System can generate detailed reports or can be used as "View Only" as often as wished.
- Ideal way to keep track of all route activities surrounding machines.
