

# Nanoptix Ultra System

Nanoptix

All the Control you want.

# Introducing the Nanoptix Ultra System\* for up to 6 machines!

\*Patent Pending

Take your business to a whole new level of control, convenience, and efficiency with the new Ultra System from Nanoptix.

- Control machines remotely.
- “Cash out” and “clear credits” at a flick of a switch.
- Monitor all activities.

## Requirements:

- All you need is a Nanoptix Spill-Proof Printer, control box, ultra board, and wire kit.
- Works with up to 6 machines.
- Any machine with an electronic “pulse” can be connected to the Ultra System (including gaming machines, vending machines, video games and more).

## How it works:

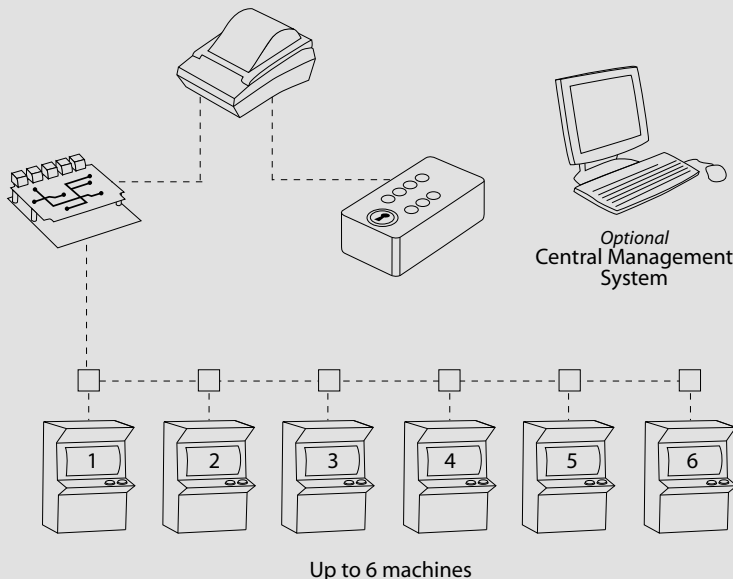

- A player adds money to your machine as usual.
- When a player wishes to “cash out”, they simply let the Attendant know which machine they were playing, and a simple push of the button on the control box triggers a printout

of their credits and clears the machine they were playing on.

- Quick, simple and gives you total control.

## Add Central System for even more Control!

- Can be added to Ultra System, Ultra System 7+, Cashless System and Cashless Attendant System.
- Allows the Operator to track all actions and transactions from all machines connected to the system from their PC.
- Every time there is an “input” or “output” from a connected machine, details are recorded and are available to the Operator.
- System can generate detailed reports or can be used as “View Only” as often as wished.
- Ideal way to keep track of all route activities.
